Summary

Comprende la información espacial referente a la susceptibilidad de los suelos a los procesos de degradación por salinización.

Description

Comprende la información espacial referente a la susceptibilidad de los suelos a los procesos de degradación por salinización en la Región Amazónica en el departamento de Nariño. La susceptibilidad se expresa según su Grado el cual indica si es Muy Alta, Alta, Media , Baja o Muy Baja . Para obtener la susceptibilidad se elaboró un modelo que tiene en consideración las características propias del suelo, aspectos biofísicos y antrópicos.
